

Salmiya Indian Model School - Kuwait

Dear Parents,

30th May, 2018

SUB: HOLIDAY ASSIGNMENT

Warm Greetings!

Holiday assignment has been uploaded by the teachers. There is no doubt, vacation is to have fun. However, students and parents need to understand that learning does not end at the classroom door. Too often children come back to school after the summer vacation, having forgotten how to write properly or complete a simple math problem because of lack of practice. Of course, doing too much of school work during the summer break defeats the whole purpose of a vacation.

Keeping the above points in mind, teachers have given a moderate amount of homework in the primary classes.

Learning Mathematics tables to improve numerical ability, a few pages of copywriting to improve handwriting/writing speed, a few grammar worksheets to improve the command over the language and a compulsory story reading to promote reading skills are the main focus of holiday assignment. Please encourage the students to develop the right attitude towards the Holiday homework. The holiday homework will be graded. Let them respect the deadlines.

The students of senior classes are advised to use this break very effectively to prepare for the board exams. As enough time is available during the vacation, students can prepare for the upcoming examinations without coming under stress/pressure. This will help the students to be more confident when they come back from the vacation.

May God bless our children.

Wishing all of them a very **Happy and Safe vacation.**

Thanks and regards,
Anita S. 
Officiating Principal
